

Find More, Use Less American Energy

\$4 per gallon gasoline hurts Americans

- Squeezing family budgets
- Stressing communities and businesses
- Threatening jobs

Find More

- Increase American production of oil by one-third:
 - 1 Offshore Exploration (1m barrels/day)
 - 2 Oil Shale (2m barrels/day)

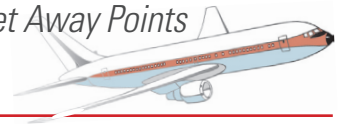

Use Less

- Reduce imported oil by one-third
- Plug-in electric cars and trucks (4m barrels/day)

Real Results

- Lower gas prices
- More energy independence
- Stop sending \$billions to the Middle East

continued ...

Find More, Use Less Republicans Will, Democrats Won't

Economics 101: Supply and Demand

- Supply of oil is not growing as fast as demand
- So prices are going up

Democrats Ignore Supply

- Ignore half the law of supply and demand
- Focus only on using less
- Propose begging Saudi Arabia for more oil
- Say “No, we can’t” to more American energy

Republicans will do BOTH

- Find more oil at home – offshore and oil shale
- Use less foreign oil – plug-in cars and trucks.

Time to Act

- Let's begin today.
- President Kennedy: 10 years to get to the moon.
- Once we start, speculators will get nervous, and
- Prices will stabilize.
